Subject: RE: FOA Christina Snowdon - Planning Application Ref: ST0201/15/TPN [NOT PROTECTIVELY MARKED]

Hi Chris,

Thanks for your email.

The monopole will have a galvanised steel finish – so grey in colour.

The cabinets will be an Ivy Green colour (BS 4800 12 C 39) with dimensions of 1500x1800x707 and the smaller cabinet 1130x550x255.

There will be minimal disruption to vegetation during Build: a crane and a team at ground level will direct the crane where trees will be fenced off to prevent harm to canopies.

Removal of limited quantity of the shrubbery with possible compensatory re-planting – subject to site provider agreement.

The cabinet and pole foundations are to be hand – not machine – dug, to minimise damage to roots of trees [A, B and C].

Excavations for the pole root and cabinet limited to square area of pole and cabinet foundations with cabinet foundation a mere 300mm in depth.

As standard practice when installing such apparatus, earth will be removed by hand. Any roots found during this excavation will be severed using a sharp handsaw or secateurs. This will ensure that the roots are not ripped or torn, and will have a good point from which to regrow, and will have a chance to occlude and prevent fungal pathogens from entering. Any root removal will be so minor as not to affect the overall root system of any of the adjacent trees.

If you have any further queries, please do not hesitate to contact me.

Kind Regards,
Ciara

Hi Ciara

The consultation period has expired today and we do not have any objections. If you are able to respond to me queries by tomorrow I will be able recommend approval to your proposals.

Kind regard

Chris

Hi Ciara

Further to my e-mail below can you please let me have the dimensions of the proposed cabinets (HxLxW).

Thanks

Chris

Hi Ciara

Thank you for your e-mail below.

Can you please let me know what the colour treatment of the monopole and cabinets would be. Also, the development would be quite close to the existing trees and shrubs. Would any of this landscaping need to be removed to accommodate the development?

Many thanks

Chris

Dear Christina,

I note that you have been assigned this case. Here is my e-mail address for correspondence.

I will be pleased to provide any further

technical;
site selection;
design;

details or additional statements on these issues in order to assist your assessment of the proposal.

Please do not hesitate to contact me in this regard.

Many thanks,
Ciara
