South Shields, NE33 2RL

Your assumptions are correct.

Licensed contractors would deliver the waste asbestos suitably bagged or wrapped. The waste would be transferred by the contractors into the Ro/Ro skips. Once the skip is full, we Premier Asbestos Services Ltd (PASL) would arrange for a licensed contractor to uplift the skip and take it to a licensed landfill site for safe disposal and return the skip to Hebburn for the process to be repeated.

PASL would be responsible for maintaining all necessary records identifying what waste came from which contractor and on which day it was disposed of. Unless we had sufficient space in another skip no further waste would be accepted on site until the emptied skip was returned. We believe the collection, transportation to Middleborough, and return process takes approximately 4 hours.

Therefore PASL will have no reason to accept any waste that could not be placed into a secure Ro/Ro skip for disposal.

I trust you find everything in order, however should you require any further information, please contact me on this email address or on 0191 4308383.

Yours sincerely

Kevin Cobb
