| ME         | Malus 'Evereste'                | 8 - 10cm girth  | As Shown on Plan | 5     |

**NOTES:**

- All works to be carried out in accordance with best horticultural practice and to the British Standards.
- All existing vegetation to be retained shall be identified and protected prior to work commencing on site.
- Planting within lightness shall not exceed 600mm height. Standard trees shall be clipped so that their stems do not present a walk within visibility zones.
- No tree planting shall occur within 2m of underground services or drainage runs without tree root management product by Greenleaf (or similar approved), or within 2m of overhead cables.
- All topsoil to BS 3882: 1994 Premium Grade, ameliorated with fertilizer and soil conditioner.
- All Fine Heavy and Super Standard trees to be planted in prepared pits, min 1000mm dia x 1000mm deep with min 150mm clearance around rootball, backfilled with ameliorated topsoil. All trees to be securely staked.
- Ornamental grades will be specified in prepared 450mm deep pits, backfilled with ameliorated topsoil.
- Cross seeding to be carried out on prepared seedbed, topsoil min depth 150mm.
- All planting to be carried out in season (November to March). Program may require preparation of planting grid and markers in summer but these will remain marked and maintained in season. Should incursions require planting 'out of season' all sites will be watered-in before and after planting.
- All planting subject to minimum 12months' concurrent maintenance and defects liability period.
