	Rubus fricolor (C, 20-30)	3.0%

**NOTES:**

- All works to be carried out in accordance with best horticultural practice and to the latest British standards.
- All existing vegetation to be retained shall be identified and protected prior to works commencing on site.
- Planting within sightlines shall not exceed 600mm height, staked trees shall be sited so that their stems do not present a void within visibility strips.
- No tree planting shall occur within 2m of underground services or drainage runs without tree root management product by Greenleaf (or similar approved), or within 2m of overhead cables.
- All topsoil to BS 3882: 1994 Premium Grade, ameliorated with fertilizer and soil conditioner.
- All Erico Honey and Select Staked trees to be planted in prepared pits, min 1000mm dia x 1000mm deep with min 150mm clearance around rootball, backfilled with ameliorated topsoil. All trees to be securely staked.
- Ornamental shrubs will be planted in prepared 450mm deep beds, backfilled with ameliorated topsoil
- Grass seeding to be carried out on prepared seeded, topsoil min depth 150mm.
- All planting to be carried out in season (November to March). Program may require preposition of planting areas during the summer but these will remain marked and maintained in season. Should programs include planting 'out of season' all stock will be watered-in before and after planting.
- All planting subject to minimum 12months' concurrent maintenance and defects liability period.
