NOTES:

- All works to be carried out in accordance with best horticultural practice and to the British Standards.
- All existing vegetation to be retained shall be identified and protected prior to works commencing on site.
- Planting within sightlines shall not exceed 600mm height, standard trees shall be clipped so that their stems do not present a view within visibility study.
- No tree planting shall occur within 2m of underground services or drainage runs, without tree root management product by Greenleaf (or similar approved), or within 2m of overhead cables.
- All topsoil to BS 3882: 1994 Premium Grade, amended with fertilizer and soil conditioner.
- All Pines Heavy and Select Standard trees to be planted in prepared pits, min 1000mm dia x 1000mm deep with min 150mm clearance around rootball, backfilled with unadorned topsoil. All trees to be securely staked.
- Ornamental grades will be specified in prepared 450mm deep beds, backfilled with unadorned topsoil
- Cross seeding to be carried out on prepared seeded, topsoil min depth 150mm.
- All planting to be carried out in season (November to March). Program may require preparation of planting areas during the summer but these will remain mulched and maintained in season. Should programs require planting 'out of season' all stock will be watered before and after planting.
- All planting subject to minimum 12months concurrent maintenance and defects liability period.
