**NOTES:**

- For Planting Schedule see drawing number 50/743-106
- All works to be carried out in accordance with best horticultural practice and to the best British Standard.
- All existing vegetation to be retained shall be identified and protected prior to works commencing on site.
- Planting within depths shall not exceed 400mm height (excluding root ball) and shall not have stems or roots present a wall within visibility splay.
- No tree planting shall occur within 2m of underground services or drainage runs without tree root management product by GreenShield (or similar approved), or within 2m of overhead cables.
- All local to BS 3883: 1994 'Premium Grade' ameliorated with fertiliser and soil conditioner.
- All Erect Heavy and Select Standard trees to be planted in prepared pits, min 1000mm dia x 1000mm deep with min 150mm clearance around rootball, backfilled with ameliorated topsoil. All trees to be securely staked.
- Commercial plants will be delivered in prepared 450mm deep beds, backfilled with ameliorated topsoil
- Grass seeding to be carried out on prepared seedbed, topsoil min depth 150mm.
- All planting to be carried out in season (November to March). Plants must be delivered to site prior to planting. Plants should be summer but these will remain mulched and maintained in weed-free condition until the earliest appropriate planting in season. Should programs require planting out of season all stock will be watered-in before and after planting.
- All planting subject to minimum 12months concurrent maintenance and defect liability period.
