Allan ,

This should cover our response for your item 8 .

Cheers

Hi Anthony,

Anytime from now would be fine for the 10x10 - as discussed, we would need to have someone present during stripping of overburden then allow a few days for excavation and recording. Good weather would help, obviously!

I checked with the county archaeologist and can confirm that no WB is required on the rest of the site, so you're free to work there without archaeological interference.

Best regards,

Richard

Richard , We are still working to get this on site , in discussion with the Planners etc . There's a couple of points to clarify / agree wondered if you could assist .

- We need to agree when the best time from your perspective to complete the 10mx10m grid .
- Can you confirm there is no need to establish a watching brief on the remainder of the site .
