INTRODUCTION

Nationwide Data Collection was commissioned by TSP Projects to undertake a rail and pedestrian survey at South Drive Level Crossing, Newcastle. The survey included a classified pedestrian census. A general location plan is shown in Diagram 1.

Contract Specification

In accordance with our contract the survey was carried out in association with TSP Projects Specification and the following Network Rail Specifications NR/STPE/YLX/T06.003/002 'Level Crossing Traffic Census for Road, Rail and Pedestrian Users' for a Level Crossing' dated February 2008.

Survey Conduct/Data Presentation – Traffic Census (Specification - Appendix A)

The pedestrian survey was undertaken at the level crossing by telescopically mounted cameras that were installed over 9 consecutive days from Saturday 4th February 2017 to Sunday 12th February 2017 over the hours 06:00 – 24:00 each day. (7th February 2017 re-placed with 14th February 2017 due to loss of footage). The camera equipment was installed from the highway and at no time did we go onto Network Rail land or property. The resulting camera images (consisting of 9 days, 18 hours per day) recorded at the crossing was then analysed in the Ossett office by experienced staff all closely supervised. The pedestrian data was recorded in 15 minute intervals classifying the movements over the crossing into the categories shown below, all in accordance with the TSP Projects and Network Rail specifications:

- The Number of Trains Passing
-
- Type of Foot Traffic Using The Crossing:
 - ⇒ Adult Pedestrians and Accompanied Children of School Age
 - ⇒ Child Pedestrians of School Age Not Accompanied By Adults
 - ⇒ Elderly/Infirm
 - ⇒ Pedestrians with Pushchairs
 - ⇒ Pedestrians carrying Tools or Equipment
 - ⇒ Joggers/Runner
 - ⇒ Pedestrians wearing hoods/headphones
 - ⇒ Dog Walkers
 - ⇒ Pedal Cycles
 - ⇒ Herded Animals and Horses

The results have been tabulated and are presented in Appendix A.

BUSIEST DAY OF THE SURVEY - DEFINITION

The busiest day of the survey is defined as the day in which the highest numbers of pedestrians travel across the level crossing. Information for the busiest day is detailed below along with the busiest hourly period and busiest quarter hourly period of the survey which is also defined by the highest number of pedestrians that travel across the level crossing. As requested by TSP Projects 2 copies of DVD's for every day has been sent for the level crossing in accordance with standard procedures.

SUMMARY

The survey undertaken at South Drive Level Crossing in Newcastle ran generally successfully but the data for Tuesday 7th February 2017 was found to be corrupt when retrieved from site. With the agreement of TSP Projects an additional day was recorded on Tuesday 14th February 2017 and the results for this day have been adopted in lieu of the 7th February 2017.

The Manual Level Crossing Count for rail and pedestrian users started on Saturday 4th February 2017 and continued for 9 days until Sunday 12th February 2017 plus Tuesday 14th February 2017 with survey hours of 0600 to 2400.

The survey data provided should offer the client adequate information for any further analysis required. Since the report has been forwarded in electronic format, we consider that we have satisfactorily completed all elements of the survey in accordance with the specification.
