East Boldon Green Spaces Group

After nearly 40 years of neglect the area in front of St George's church now has the **potential** to be improved.

A small number of individuals have come together, led by Reverend Paul and helped by East Boldon Neighbourhood Forum, to produce the below plan.

It is not to scale, or professionally produced, but, it represents consultations of interested parties within the church and in the community.

This plan along with Topology report, Heritage statements, Location plan etc., has been put together and taken forward to a local architect who will take this to South Tyneside Council for planning approval, for the Green Space Group, free of charge.

The idea, all along, has been for a joint venture between Council, church members and the Forum, and that work and costs will be shared by all parties.

Grants also can be applied for as this venture is community based.

After many years of this eyesore within our village a light at the end of the tunnel is looming.

Please support the Green Spaces Group in any way you can.

Thank you.
