Description of Proposed Works

Please describe the proposed works

Replacement of 2 roof windows. Current windows are unsuitable as they cause considerable condensation and are prone to leaking during heavy rain. This is causing water damage to the surrounding brick and plaster work which is causing it to crumble. Additionally it is creating a health risk from mould. The opening mechanisms for the windows are not suitable as they cause damage to the surrounding plasterwork. The existing 2 roof windows do not allow for any escape route from the 2 bedrooms they are in.

The replacement windows will be Velux Conservation windows that have a suitable opening mechanism i.e. they tilt from the middle. They have better thermal properties considerable reducing the effects of condensation. The conservation windows match those already in place i.e. same colour (black) and have a black frame strip down the centre.

The replacement windows have been quoted as being best fit for the apertures due to the sizes of conservation windows.

Details of the pre-application advice received

I did not directly contact Adam Williamson, however I was copied in on a very similar planning application for the roof windows in the neighbouring property of 3 Barns Close and reviewed the advice that Adam provided in that instance. The advice received was that the windows needed to be conservation windows including central glazing bar.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:
(a) a member of staff
(b) an elected member
(c) related to a member of staff
(d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
