Sizes approximate taken from online examples of triple bin stores

Cladding – for side extension

Materials: Capped WPC – Co-extrusion
Colour: Natural Wood Effect (e.g. oak, silver birch)
Cladding style: Either slatted or panel cladding – the purpose of the cladding is to hide the "muddy side entrance" doorway so the house doesn't look like it has 2 front doors.
We prefer the panel cladding, however the slatted cladding may prove more practical for the intended purpose.

Windows

Materials: uPVC
Colour: Agate Grey
Style: Flush casement (possibly with leaded panes)
