Planting Guidance:

All works to be carried out in accordance with best horticultural practice and to the latest British Standards.

All existing vegetation to be retained shall be identified and adequately protected prior to works commencing on site.

Planting within sightlines shall not exceed 600mm height, specimen trees shall be aligned so that their stems do not present a 'wall' within visibility splays.

No tree planting shall occur within 2m of underground services or drainage runs without tree root management product by GreenBlueUrban (or similar approved), or within 2m of overhead cables.

All topsoil to BS 3882: 2015 'Premium Grade', ameliorated with fertilizer and soil conditioner.

All specimen trees to be planted in prepared pits, min 1000mm wide x 1000mm deep with min 150mm clearance around rootball, backfilled with ameliorated topsoil. All trees to be securely staked.

All Extra-Heavy Standard specimen trees to be supported by an irrigation system (e.g. Green Blue Urban 'Root Rain Metro' or similar approved)

All shrubs and hedges will be planted in prepared 450mm deep beds, backfilled with ameliorated topsoil.

All lawn areas to be carried out on prepared topsoil with fine tilth, topsoil minimum depth of 150mm.

All private front gardens to be seeded with amenity grass seed where planting is not identified on plan.

All adopted verges to be seeded with amenity grass seed.

All planting to be carried out 'in season' (November to March). Program may require preparation of planting areas during the summer but these will remain mulched and maintained in weed-free condition until the earliest appropriate planting season. Should programs require planting 'out of season' all stock will be watered-in before and after planting.

All planting subject to minimum 12 months concurrent maintenance and defects liability period.
