

MODEL RANGE - EGS 6

From £23,800 - Fully customisable size & spec

EGS 6 — Bold Design, Seamless Flow

The EGS 6 takes garden room living to the next level. Designed to impress from every angle, this striking model features corner-opening aluminium bifold doors that effortlessly blur the lines between indoors and out, creating a stunning sense of space and freedom.

A standout feature of the EGS 6 is its extended canopy, which wraps around both the front and side elevations. Paired with matching extended side walls, it adds depth, shelter, and architectural interest—while the integrated LED spotlights bring the space to life after dark.

To complement the structure, a beautifully crafted composite deck mirrors the canopy design, offering a seamless connection between the building and your outdoor space.

Whether you're hosting friends, relaxing in the sun, or working in a light-filled environment, the EGS 6 delivers an elevated experience in every way.

With its bold geometry, premium materials, and commanding presence, the EGS 6 is the ideal choice for those who want their garden room to make a lasting statement.
